DETAILED ACTION

Claims 1-14 are pending in the application.

Allowed Claims

Claims 1-14 are allowable over the prior art of record.

Reason For Allowance

The following is an examiner's statement of reasons for allowance:

applicants' claim a method comprising reacting a dihalomethyl compound with a sulfoxide in the absence of an effective amount of an activating reagent to form the corresponding aldehyde, according to the reaction:

wherein all the variables are as defined in the claims was neither found to be obvious nor anticipated by the prior art of record.

The closest art is Saldabols et al., {Study of the Reaction of Dimethyl Sulfoxide with Bromo- and Dibromomethyl aryl ketones, Sery Sernistykh Neftei, 13th 1994, 188}. Saldabols et al. disclose the oxidation of BrCH₂CO-Aryl with Me₂SO to give Aryl-COCHO and Aryl-COCO₂Me. Both processes are different in that prior art process gave two products (aldehyde and ester) while applicants claimed a process that gives an aldehyde product. Additionally, prior art process employed dibromomethyl aryl ketone as starting material while applicants claimed a process that employs dihalomethyl aryl as starting material. See abstract.

Art Unit: 1621

A further search of the prior art failed to uncover any reference that taught or motivated one of ordinary skill to disclose a method for making aldehyde with a dihalomethyl compound, sulfoxide and in the absence an activating reagent as claim by applicants.

All claims (1-14) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
